

Faculty of Computer Science 2007-2008 Seminar Series

Web Engineering with Ruby-on-Rails and Social Architectures

By

Dr. Dan Martell

Director of e-Business
Spheric Technologies Inc, Moncton, New Brunswick

Wednesday, February 20th, 2008

3:30pm

ITC317

Web Engineering with Ruby-on-Rails and Social Architectures Learn how build a Social Network in one day, and what the future holds for Ruby (and Rails) as a development platform.

Dan has more than 7 years of information technology and technical Business experience. He has over the past three years as a founder of Spheric, created a unique, vibrant and productive culture within Spheric. He has extensive experience in social design, business process, online collaboration and has successfully led many technical engagements with Fortune 500 customers. In addition to his extensive background in Internet/Intranet development, he also has used his highly developed presentation and communication skills as a thought leader in both the assessment and adoption of new technologies and processes that is driving Innovation at an accelerated pace.

STUDENTS ARE ENCOURAGED TO ATTEND
