NOTE REVISED DATE

Faculty of Computer Science
2002-2003 Seminar Series

A UNB-Fredericton Interactive Campus Map
By
Rick Wightman
Faculty of Computer Science
University of New Brunswick

Monday October 7th, 2002
3:30 p.m.
ITC317

Refreshments will be served at 3:15 p.m.

This past summer a small, unofficial pilot project was initiated to understand how GIS might help UNB in managing and displaying enterprise information with ESRI's ArcIMS 3.1 application. Using an ArcView and ArcGIS, a campus map was constructed with roads, building and parking layers as well as geo-referenced aerial photography from 1995 and 1947. Based on a Sun Sparc5, http://maps.cs.unb.ca is now operational for demonstration purposes with the intent of sparking discussion and ideas among students, staff and administration, both technical and non-technical alike, about what other applications this technology could have for the institution.

GRADUATE STUDENTS ARE ENCOURAGED TO ATTEND
