## University-Industrial Research Opportunities and MITACS

By

**Ian Baird**

---

The Atlantic Canadian office of the MITACS (Mathematics of Information Technology and Complex Systems) NCE, consisting of Ian Baird, MITACS Atlantic Business Development Director and David Bremner, MITACS Atlantic Scientific Director, is housed in the Faculty of Computer Science. Ian will discuss how FCS faculty can take advantage of this presence by participating in MITACS programs ranging from 1 semester, \$15,000 internships through conference and summer schools, to full projects valued at \$200,000 a year over several years. Ian will also discuss where he sees opportunities for university-industrial collaboration in the region and how Ian and David can help FCS faculty with industrial research partners.

For more information, visit <http://www.mitacs.ca>

**STUDENTS ARE ENCOURAGED TO ATTEND**
