2003-2004 Seminar Series

Building the National Science Digital Library (U.S.)

By

Diane Hillman

Diane Hillman is a member of the Cornell Digital Library Research Group, part of the Faculty of Computing and Information. Diane's background is in libraries and one of her area's of expertise is in metadata. She has been involved with the Dublin Core Metadata Initiative since 1995 and is a member of the Dublin Core Advisory Committee and a member of their Usage Board.

Monday, October 27, 2003
3:30 p.m.
ITC317

Refreshments will be served at 3:20 p.m.

In December 2002 the National Science Digital Library (NSDL) was unveiled by the U.S. National Science Foundation. Diane I. Hillman of Cornell University, one of the co-Principal Investigators for the Core Infrastructure portion of the NSDL, will discuss the project as it stands today, as well as future plans. She will also outline some related work developing innovative techniques for evaluating metadata going into the NSDL Metadata Repository and criteria for describing and measuring metadata quality.
