**BiKe: Interoperable Electronic
Health Record Systems and
Semantic Web Projects**

By:
Sungin Lee

This seminar introduces the Biomedical Knowledge Engineering Laboratory (BiKe), Seoul National University, South Korea, with its research work in the areas of Interoperable Electronic Health Record (EHR) systems and Semantic Web projects, and potential research collaboration opportunities in Korea.

BIO: Sungin Lee is a leading researcher and a Ph.D candidate in medical informatics at BiKe. He has extensive industrial experience in Web technologies and Digital Libraries. He worked for EDS Innovations in Toronto, and ran a digital library solution company in Korea.

Friday, May 14th @ 2:30pm
Location ADI room, C-25
