FOR CIO PROFESSIONALS

The Public Cloud Services Market Will Grow Rapidly To $236 Billion In 2020

2020 Sizing Forecast Shows Strong Growth, But With Signs Of Maturity On The Horizon

September 1, 2016

Why Read This Report

Public cloud services are the biggest disruption in the tech market in the past 15 years — and adoption is accelerating. We project that revenue from public cloud platforms, business services, and applications (software-as-a-service [SaaS]) will grow at an overall CAGR of 22% between 2015 and 2020, reaching $236 billion, which is 23% higher than our previous forecast. Further, we now forecast greater adoption of cloud services to replace conventional apps, platforms, and business services. CIOs: Use this forecast to benchmark the pace and shape of your public cloud strategies.

Microsoft Imagine Azure Offer

This offer provides special Azure access rights to students that are validated through the Microsoft Imagine program. Enroll here

Microsoft Imagine gets you started with the Microsoft Azure services you need to develop in the cloud at no cost* using Visual Studio Community 2015. This benefit provides you access to a free tier including the following services:

- **Azure App Services** – A fully-managed cloud offering that enables you to build and deploy native and web apps in minutes. Use the technology you love – ASP.NET, Java, PHP, Node.js or Python. Add a variety of essential app services including authentication, social integration, offline data sync, and more, regardless of whether your app runs on Windows 10, iOS, or Android. Set-up continuous integration and deployment workflows with VSO, GitHub, TeamCity, Hudson or BitBucket – enabling you to automatically build, test and deploy your web app on each successful code check-in or integration tests.
- **Notification Hubs** – Keep your app in-touch with users by enabling you to send mobile push notifications tailored by audience, language, and location using any back end, and major mobile platforms.
- **SQL Database** – Build secure, global SaaS applications that support massive scale.
- **MySQL database from MySQL in-app(Preview)** which gives you the experience of native MySQL support for your Web Apps. You can deploy CMS solutions such as WordPress , Joomla etc. or custom application driven by MySQL database. Read this article to learn more about MySQL in-app(Preview) feature.
- **Application Insights** provides you with the deep diagnostics and performance telemetry to ensure your web apps and services are running at their maximum potential. Search and analyze your data to continuously improve your application, prioritize future investments and improve the overall customer experience.
- **Visual Studio Team Services** provides a set of cloud-powered collaboration tools that work with your existing IDE or editor, so your team can work effectively on software projects of all shapes and sizes.

Researchers

Accelerate the speed of scientific discovery with Microsoft Azure

The Microsoft Azure for Research program accelerates scholarly and scientific research customized for academic, government, and industry researchers to use big data computations, collaboration, and data-intensive processing in the cloud. Take full advantage of the power and scalability of Microsoft Azure, a platform that supports frameworks like Azure Machine Learning and programing tools including Linux, Python, Java, Hadoop, and Microsoft .NET. Get access to a variety of tools and resources to maximize the benefits of cloud computing by the following:

- Free access to Azure cloud computing and storage (submit proposals for Azure for Research Awards)
- Training classes and webinars
- Technical resources and support
- Community discussion on LinkedIn (Microsoft Azure for Research group) and Twitter (@Azure4Research)
